OPERATIONS & DATA ARCHIVE — CONSOLIDATED RECORD

Revision 7.3 • mixed source export • partially normalized • 2023–2026

This document is a deliberately heterogeneous archive assembled from operational exports, dashboard snapshots, meeting notes, inventory extracts, support logs, performance observations, and manually entered records. Column definitions vary between sections. Some records are duplicated, abbreviated, split across pages, or embedded in visual summaries. Dates use multiple conventions. Currency values may be INR, USD, or local units unless otherwise stated.

4. FIELD NOTES / RAW OBSERVATIONS

2026/02/14 | North cluster | Latency elevated between 09:00–11:30; dashboard showed 4.8%, raw monitor 6.1%. Recheck aggregation.

14-03-26 | Billing | Invoice batch 77B has 214 records but reconciliation sheet says 219. Five entries have blank customer_ref.

Apr 02 | Security | Several access events were imported without region. Region inferred in old workbook but not copied here.

2026.05.19 | Support | Ticket sequence has R-1841 then R-1841-A then R-1841. Duplicate may be legitimate child record.

June | Inventory | Units alternate between GB and GiB. Do not mix totals without conversion. Some rows are estimates.

07/07/2026 | Network | Packet-loss note copied from chat: 0.7 / 1.2 / 0.9; unclear if values are percentages or ratios.

Aug 18 | Delivery | Site code GGN appears as Gurgaon, Gurugram, and GGM. Master mapping not consistently applied.
